SHEKINAH HOME NURSING CARE, Malaysia

2019 FLC Project: Shekinah Home Nursing Care (Selangor, Malaysia)

An elderly care center closed down last year and the residents were relocated. Among them was Madame Ambiga, a 74-year old single woman. She was suffering from chronic asthma coupled with acute knee problems that greatly hampered her mobility. She needed medical care however most homes for senior citizens were not willing to take her in because she could not afford to pay for her upkeep. The only option for her was a government-funded old folks' home, which are typically poorly kept and managed.

The Shekinah Home embraced and welcomed her. The day Madame Ambiga arrived at our home, she was crying, "Will you beat me? I don't know what to do." She was very afraid.

After 18 months at Shekinah Home, her asthma is now under control with daily medication. She moves around slowly with the help of a walker. Gone is her fear. She worships with other residents with great joy and her faith in God is unshakeable. She said, "I have you to love me and God to protect me...I am thankful!" The FLC grant helped Shekinah Home welcome and support Madame Ambiga and other elderly women live out their twilight years with dignity and self-worth.

Leader 6: I've definitely experienced positive changes after spending time with women who I normally wouldn't have a cup of coffee with. But after participating in this program in Sarajevo, I can't wait to meet them again. I talked about faith, prayer, and confidence with women outside of my religious tradition, without having the need or wish to convert or convince them of being wrong. This is a significant change in my life. The workshops did an amazing job of crushing my stereotypes and the small group discussions made it possible for me to open up completely and say what I think, which I had never liked doing before. I loved being there. Sarajevo... with everything that runs through my mind when someone mentions the city, I can honestly say that it has left a deep impact on me. I remember being full of prejudice and misconceptions, being arrogant, and having self-righteous views of Islam, especially of women in Islam. After Sarajevo, all of that changed. – *Marija*

VROUWEN EN GEZONDHEID: PRATEN EN ERVARINGEN DELEN

Als je nieuw bent in een land en je spreekt de taal niet zo goed en weet de weg niet, dan is het soms lastig om goede hulp te zoeken. Ook als je wat langer in een land woont, is het soms moeilijk om jouw weg te vinden. De Nederlandse gezondheidszorg is vaak ingewikkeld. Bij wie kun je terecht? Waar kun je terecht? Hoe moet je je aanmelden? Moet ik eerst naar de dokter of direct naar een specialist of het ziekenhuis?

Dat zijn allemaal vragen waar je mee te maken kunt hebben. Huis van Compassie wil samen met het Zorgcafé en Dokters van de Wereld vrouwen helpen om wat makkelijker hulp te zoeken en te vinden. Ook is het fijn om ervaringen te delen en van elkaar te leren. Gezellig samen zijn om over onderwerpen te praten is fijn en kan jou tips of hulp opleveren. Daarom organiseren wij een praatgroep voor vrouwen. 5x willen wij bij elkaar komen. We praten dan over gezondheid algemeen, over voeding, gebruik van geneesmiddelen en zelfhulp middelen, over stress, opvoeding van kinderen in Nederland.... Als jij wilt, kun je ook een onderwerp inbrengen. Deelname is gratis.

Het Zorgcafé is in huiskamer Gezellig te vinden. Elke nieuwe Nederlander kan hier binnenlopen. Het is een eerste stap naar passende hulp. De vrijwilligers met medische - en ggz achtergrond en de Arabisch -, Farsi - en Tigrinya sprekende tolken gaan in op alle problemen met gezondheid en vragen over de huisarts, ziekenhuis of andere hulpverleners. Het Huis van Compassie biedt activiteiten aan voor mensen in een kwetsbare positie. De gespreksgroepen vinden plaats in het Huis van Compassie.

Leader 7: The taboo of discussing menstruation leaves many girls with little or no knowledge about this important bodily function. Many girls think of it as an abnormality or disease while others have no knowledge of the menstrual cycle at all. By staying home during their monthly cycle, girls can miss up to 20% of their education. As well, a Gates Foundation report found that to manage their periods, some girls trade sex for pads, which exposes them to early pregnancy, HIV/AIDS, or other sexually transmitted diseases.

Last year, approximately 300 girls from the Siloam Kware School attended ten Menstrual Hygiene Management workshops. Each girl who attended received a menstrual kit and an increased awareness of how to manage her monthly cycle. In addition, the boys at this school were encouraged to participate in workshops on the attributes of positive manhood. As a result of this project, both girls and boys learned positive life skills to help them learn, survive, and prosper in this increasingly complex world.

IN CONCLUSION: the Essence of the Law (Matthew 23.23)

JUSTICE, MERCY AND FAITH

He has told you,
O mortal,
what is good;
and what does the
Lord require of you
but to do justice, and
to love kindness,
and to walk humbly
with your God.
(Micah 6.8:NRSV)
